

# PROJECT - 3

```
//program to read bill amount and balance amount
```

```
//program name: 003_As.c
```

```
#include<stdio.h>
```

```
int main()
```

```
{
```

```
    int TB,CP,BR;
```

```
    TB=CP=BR=0;
```

```
    printf("Input");
```

```
    printf("\nEnter the Total Bill Amount      :");
```

```
    scanf("%d",& TB);
```

```
    printf("\nEnter the Amount Paid by the Customer:");
```

```
    scanf("%d",& CP);
```

```
    BR=CP-TB;
```

```
    printf("\n\nOutput");
```

```
    printf("\nBalance Amount to be Returned is:%d",BR);
```

```
    return 0;
```

```
}
```

**Input**

Enter the Total Bill Amount :1895

Enter the Amount Paid by the Customer:2000

**Output**

Balance Amount to be Returned is:105

Process returned 0 (0x0) execution time : 15.310 s

Press any key to continue.
