

# PROJECT – 2

//program to read price of iPhone & Cover Case and calculate total Bill

//program name: 002\_As.c

```
#include<stdio.h>
```

```
int main()
```

```
{
```

```
    int i,c,t;
```

```
    i=c=t=0;
```

```
    printf("Input");
```

```
    printf("\nEnter Price of iPhone    :");
```

```
    scanf("%d",& i);
```

```
    printf("\n Enter Price of iPhone Cover:");
```

```
    scanf("%d",& c);
```

```
    t=i+c;
```

```
    printf("\n\nOutput");
```

```
    printf("\nTotal Bill:%d",t);
```

```
    return 0;
```

```
}
```

**Input**

Enter Price of iPhone :120000

Enter Price of iPhone Cover:5000

**Output**

Total Bill:125000

Process returned 0 (0x0) execution time : 13.547 s
