PROJECT-18

```c
//program name: 018_As.c

#include<stdio.h>

int main()

{

    int pm,lm;

    float tu;

    const float U=7.85;

    printf("Enter The present month electricity Bill...:");

    scanf("%d",&pm);

    printf("Enter The last month electricity Bill...:");

    scanf("%d",&lm);

    tu=(pm+lm)/U;

    printf("the total units in last months and present month...:%f",tu);

    return 0;

}
```

```
Enter The present month electricity Bill...:4500
Enter The last month electricity Bill...:3500
the total units in last months and present month...:1019.108276
Process returned 0 (0x0)    execution time : 13.011 s
